DETAILED ACTION

This Office Action is in response to the After Final Amendment filed on October 4, 2005.

Allowable Subject Matter

1. Claims 1-26 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art of record neither teaches nor suggests the claimed apparatus wherein a rotatable valve assembly has an inclined slot about its external surface, thereby enabling the filter stalk to be adjustably secured within the filter housing yet axially movable by rotation of the rotatable valve assembly such that in the backwash drain port at the bottom of the filter housing is uncovered or uncovered by the gasket stem of the filter element assembly. Depolo et al., U.S. Patent No. 4,652,369 discloses a filter assembly comprising a filter element assembly connected to the rotatable valve assembly including a filter stalk, a filter housing assembly, and a backwash drain port but does not disclose an axial movement of the filter stalk with the rotation of the valve assembly.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
